

data sheet:

TAB FusionRMS Connect

TAB FusionRMS Connect is a SaaS API that enables seamless integration between diverse systems, fostering interoperability and enhancing functionality.

Features

Access Schema-level database information and information of user-defined tables.

Grab existing data in user-defined views in the TAB FusionRMS database.

Add new and edit records to user-defined tables in the TAB FusionRMS database.

Eliminate redundant tasks – no longer worry about manual and double data entry.

No more dump and load - automate data flow between other applications systems to drive workflows and reporting.

Make better decisions - improve your decision-making ability with increased confidence about the data you receive.

Fulfills compliance obligations by providing accurate, real-time data and secure servers.

To achieve maximum efficiency in the ever-evolving digital world, you must consistently and securely share data between your applications. TAB FusionRMS Connect promotes operational efficiency by gaining the ability to send and receive data between TAB FusionRMS and your other applications. This new API helps fulfill compliance obligations by providing accurate, real-time data and secure servers.

Benefits of Integration with FusionRMS Connect

Enhanced Efficiency and Improved Accuracy

Boost operational efficiency by eliminating repetitive tasks and manual data entry through automation. These streamlined workflows help reduce your risk of errors and improve overall operational efficiency.

Real-Time Data Access and Synchronization

Facilitate real-time access to your data. Additionally, they connect with external databases and platforms. These things ensure your software is always up-to-date and reflects the latest information.

Scalability

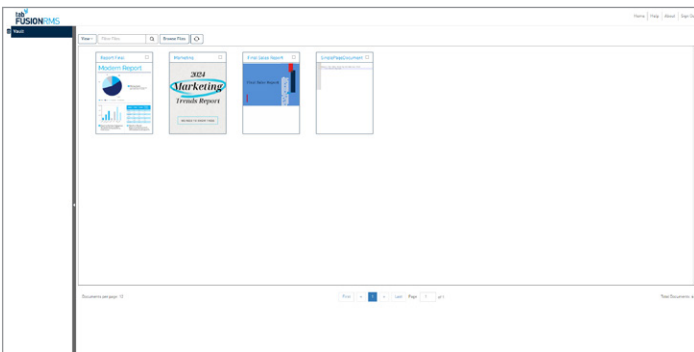

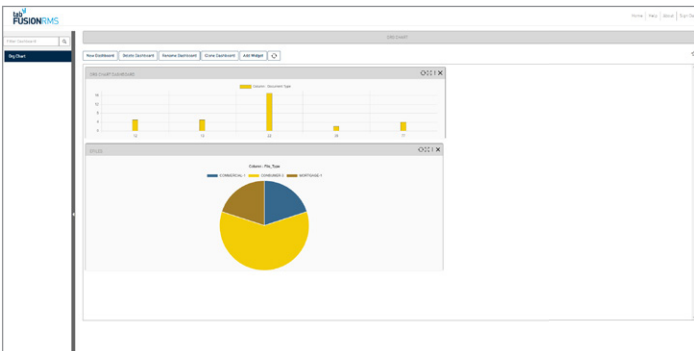

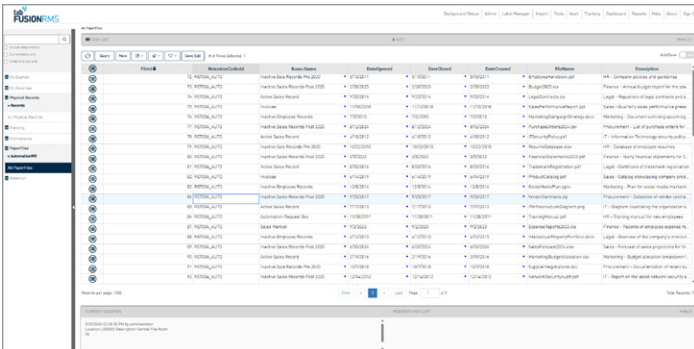

Grow and adapt effortlessly as business needs evolve. APIs support scalability, so you can always rely on your software and TAB FusionRMS.

Improved Customer Experience

Provide access to a wider range of features and functionalities. This includes adding and editing data in bulk, extracting data from TAB FusionRMS, and reviewing solution schema and structure without logging in and manually importing or exporting data.

TAB FusionRMS - The records management SaaS software that helps you store, find, and use your records.

The TAB FusionRMS Advantage

Maintain Compliance and Reduce Risk

Records don't change. Maintain their integrity to ensure regulatory and company compliance. Plus, whether you're tracking because of chain of custody or other government regulations, TAB FusionsRMS helps you maintain compliance and reduce your risk.

Retention and Lifecycle Management

From record creation to disposition, manage the entire lifecycle of your records. This can be done at the box, folder (as a whole), or document (individual) level. Set up your retention schedule and the rules around how you dispose of or move records through their lifecycle.

Decrease Your Costs

Often, up to 50% of the files stored off-site are past their retention dates, are duplicate records, or are not required for long-term preservation. Inefficient storage solutions drive up overhead costs and make it harder to access information. Eliminate unnecessary files and reduce your costs.

Enhanced Security

Integrations with Azure and Okta to leverage Identity and Access Management and Authentication and Authorization as well as multi-factor authentication and single-sign-on services.
